

Abhishek Singh

Aspiring Data Scientist with hands-on experience in data analysis, recommendation systems, and backend development
using Python and SQL.

EDUCATION

Kalinga Institute of Industrial Technology (KIIT) <i>Bachelor of Technology in Computer Science and Engineering</i>	Bhubaneswar, India 2023 – Present — CGPA: 8.44
---	---

PROJECTS

Financial Transaction Fraud Detection System <i>Python, Scikit-learn, FastAPI, Streamlit, Docker</i>	2026
- Developed an end-to-end machine learning system to classify financial transactions as fraudulent or non-fraudulent - Trained a Random Forest model on transaction features such as type, amount, and balance changes - Handled class imbalance by constructing a balanced dataset to improve fraud detection performance - Built a REST API using FastAPI for real-time predictions - Designed an interactive frontend using Streamlit for user input and result visualization - Containerized the application using Docker for consistent deployment	
Book Recommendation System <i>Python, FastAPI, Pandas, Scikit-learn, SQL</i>	2026
- Built a content-based recommendation system on a dataset of 10K+ records using similarity metrics - Designed and implemented a recommendation system using TF-IDF vectorization and cosine similarity - Performed data preprocessing and exploratory data analysis (EDA) - Developed REST APIs using FastAPI for recommendation serving - Integrated frontend interactions using jQuery	
Game Development Project – IIT Guwahati Game Jam (GameDeon) <i>Godot, GDScript</i>	2025
- Developed and published a game on itch.io as part of a 2-member team - Secured 7th position among 50 teams nationwide and invited to IIT Guwahati - Implemented core gameplay mechanics, logic flow, and event handling - Collaborated in rapid prototyping and debugging under strict time constraints	

TECHNICAL SKILLS

Languages: Python, C, C++, Java, R, JavaScript
Databases & Querying: SQL, MariaDB, SQLite
Data Science: Data Analysis, Exploratory Data Analysis (EDA), Recommendation Systems
ML Techniques: TF-IDF, Cosine Similarity
Data Tools: Pandas, NumPy, Scikit-learn, Jupyter Notebook, Matplotlib
Frameworks & Dev Tools: FastAPI, Git, GitHub, Docker (basic), Godot Engine
Web: HTML, CSS, jQuery
Platforms: GitHub Pages, Linux (CLI), VS Code

CERTIFICATIONS

IBM: What is Data Science? <i>Covered fundamentals of data science, roles, and applications in industry; Grade Achieved: 91%</i>	Coursera
IBM: Tools for Data Science <i>Learned Python, SQL, Jupyter Notebook, Git, and data analysis tools; Grade Achieved: 83.91%</i>	Coursera
IBM: Data Science Methodology <i>Studied data science workflow, project lifecycle, and methodology for analytics projects; Grade Achieved: 79%</i>	Coursera
Google: Foundations: Data, Data, Everywhere <i>Explored data-driven decision-making, data collection, analysis, and interpretation; Grade Achieved: 93.75%</i>	Coursera
IIT Guwahati Game Jam – GameDeon <i>Developed a game with a 2-member team; implemented core gameplay mechanics</i>	IIT Guwahati 2025

ADDITIONAL

Competitive Programming
Solved 250+ problems on LeetCode and CodeChef using Python and C++
